ASSIGNMENT TITLE:

Build a python code, Assume u get temperature and humidity values(generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

CODE:

```
import random
while(True):
    a=random.randint(10,99)
    b=random.randint(10,99)
    if(a>35 and b>60):
        print("high temperature and humidity of:",a,b,"% ","alarm is on")
    elif(a<35 and b<60):
        print("Normal temperature and humidity of:",a,b,"% ","alarm is
off")
    break
```

```
Temp and Humidity.py - C:/Users/Dell/Desktop/Temp and Humidity.py (3.10.7)
